

Guide to install the following components

1. MongoDB Database
2. MongoDB Shell

1. MongoDB Installation

1. Go to <https://www.mongodb.com/try/download/community>

2. Download MongoDB for windows platform

Version	8.0.6 (current)	▼
Platform	Windows x64	▼
Package	msi	▼

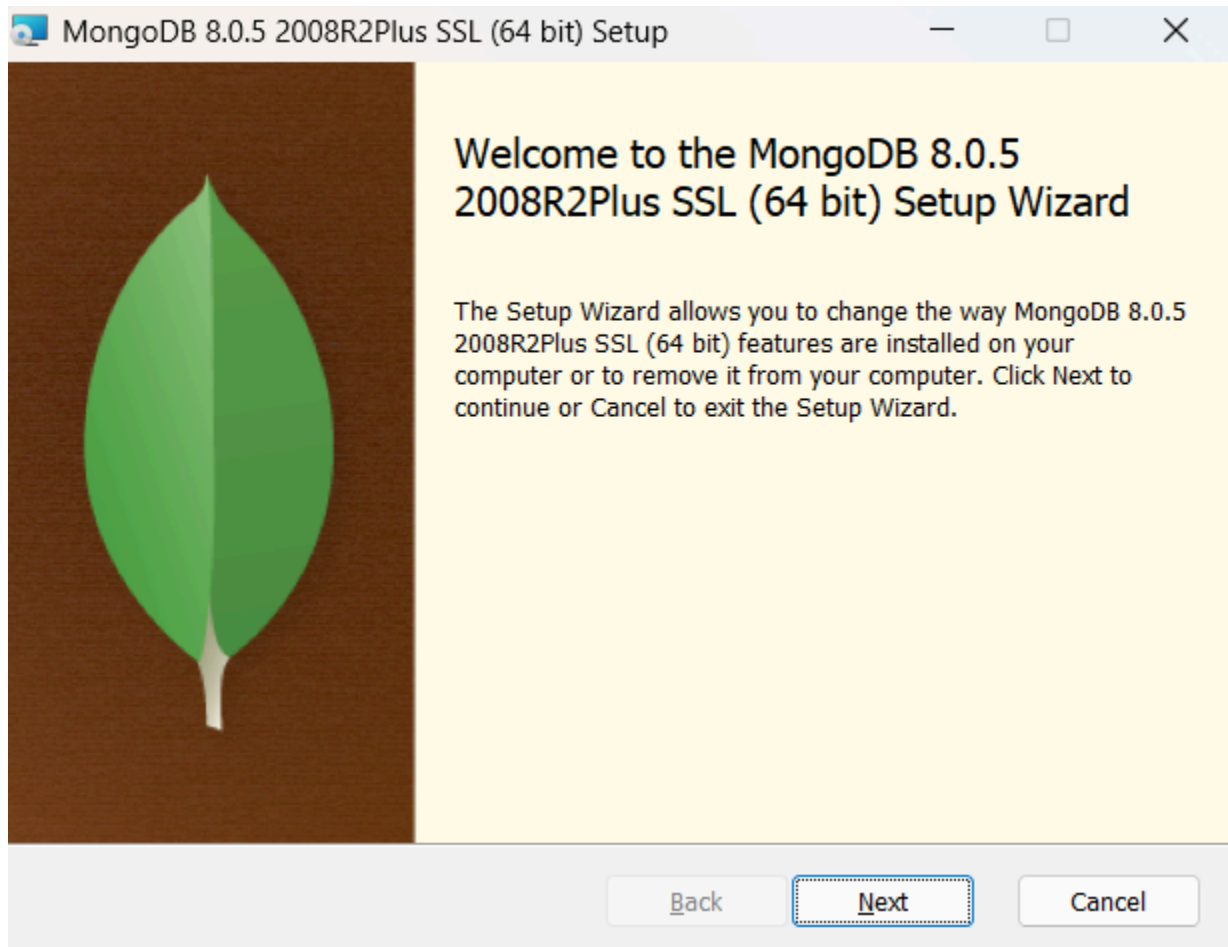

Download 

 Copy link

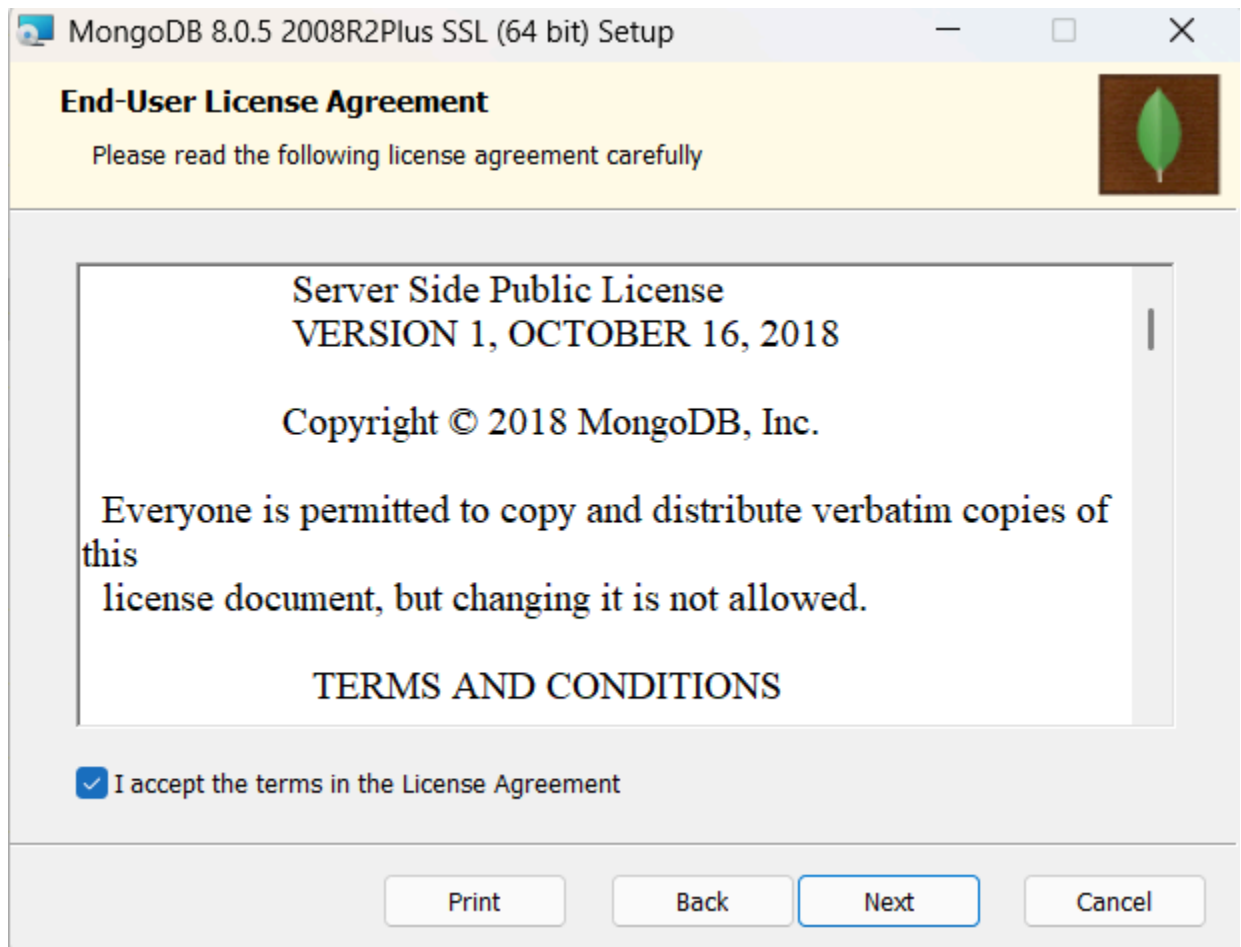

More Options 

The file named '[mongodb-windows-x86_64-8.0.5-signed](#)' will be downloaded.

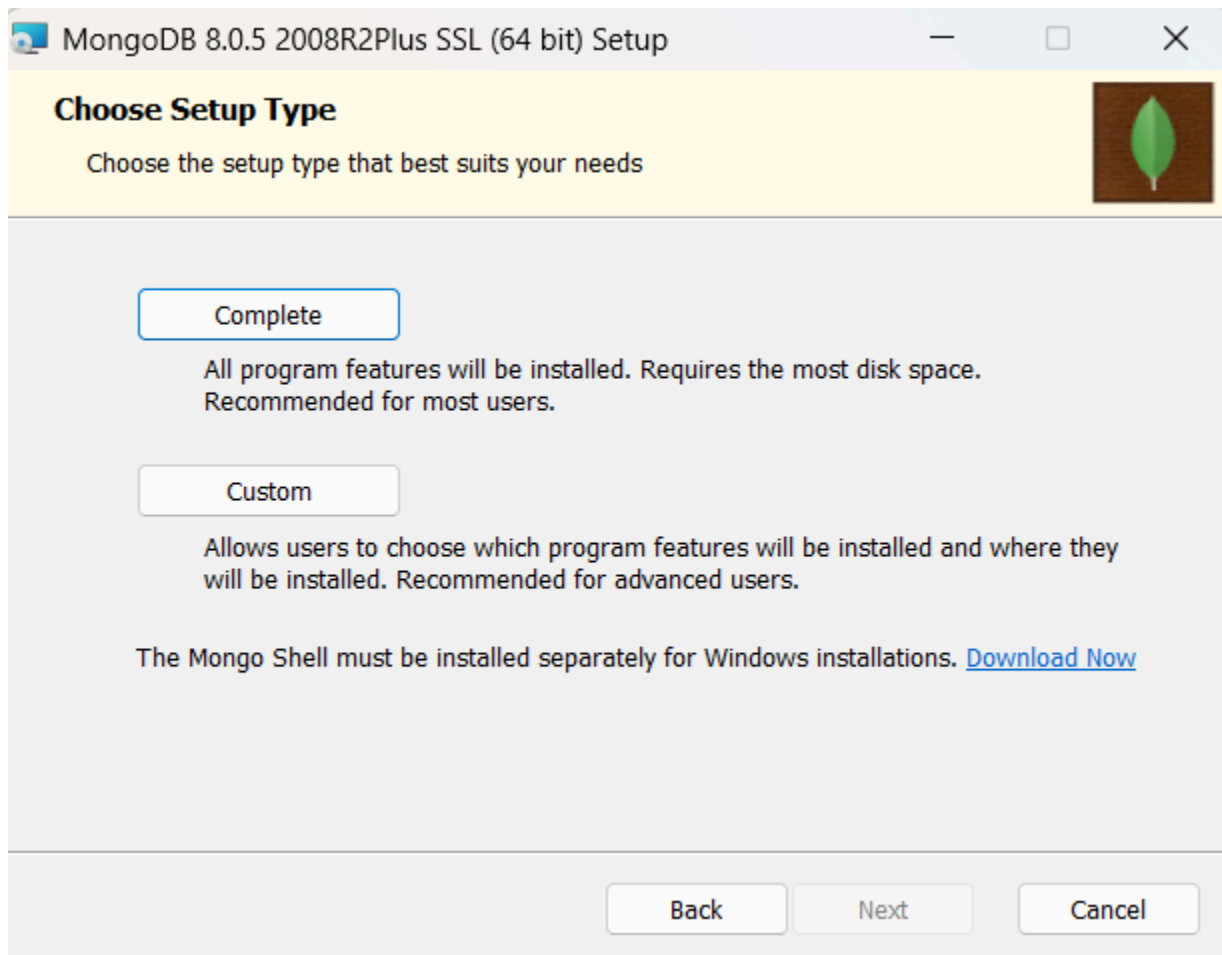

3. Double click the installer and hit 'Next'

4. Accept the terms

5. Choose setup type as 'Complete'

6. Accept default values and hit 'Next'

Service Configuration
Specify optional settings to configure MongoDB as a service.

☒ Install MongoDB as a Service

☒ Run service as Network Service user

☐ Run service as a local or domain user:

Account Domain:

Account Name:

Account Password:

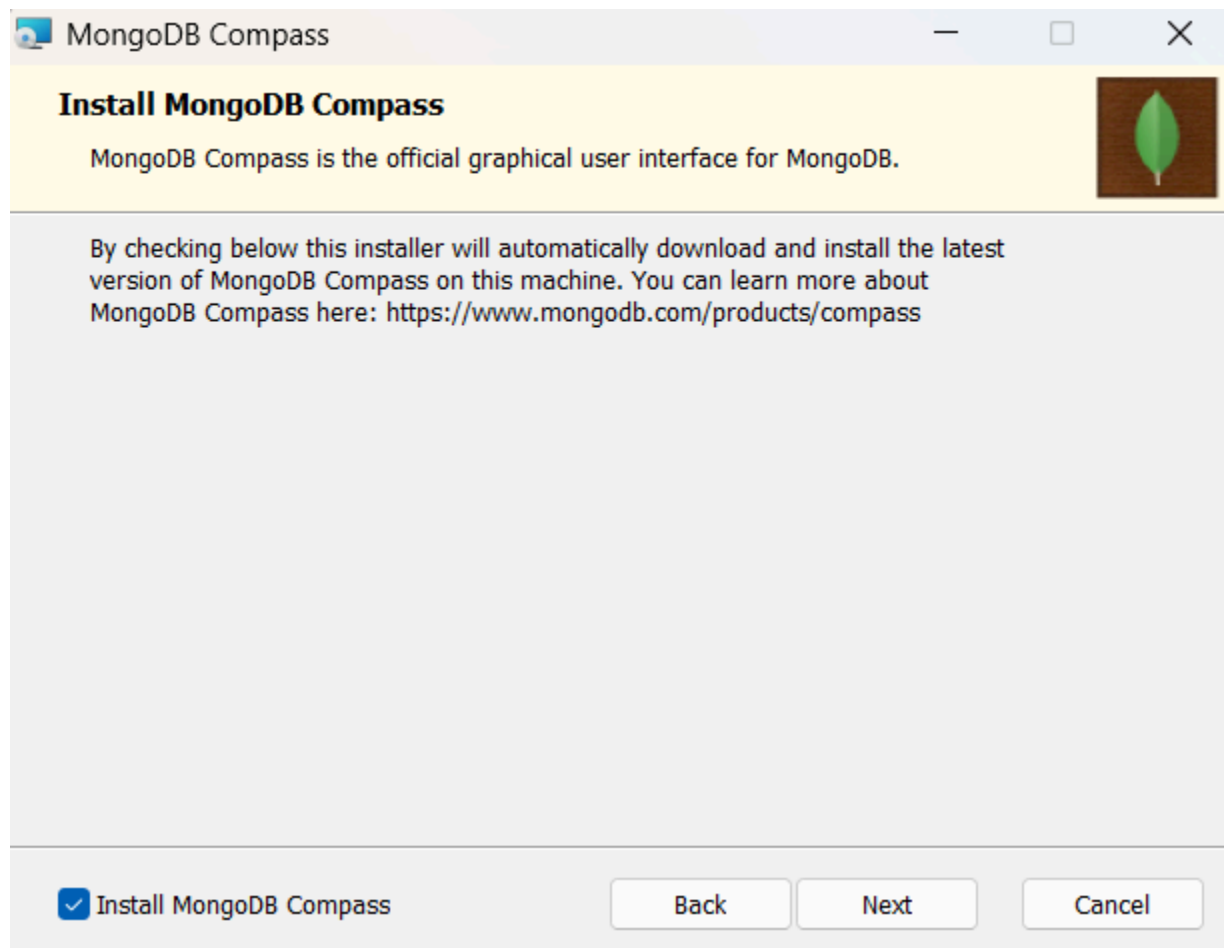

Service Name:

Data Directory:

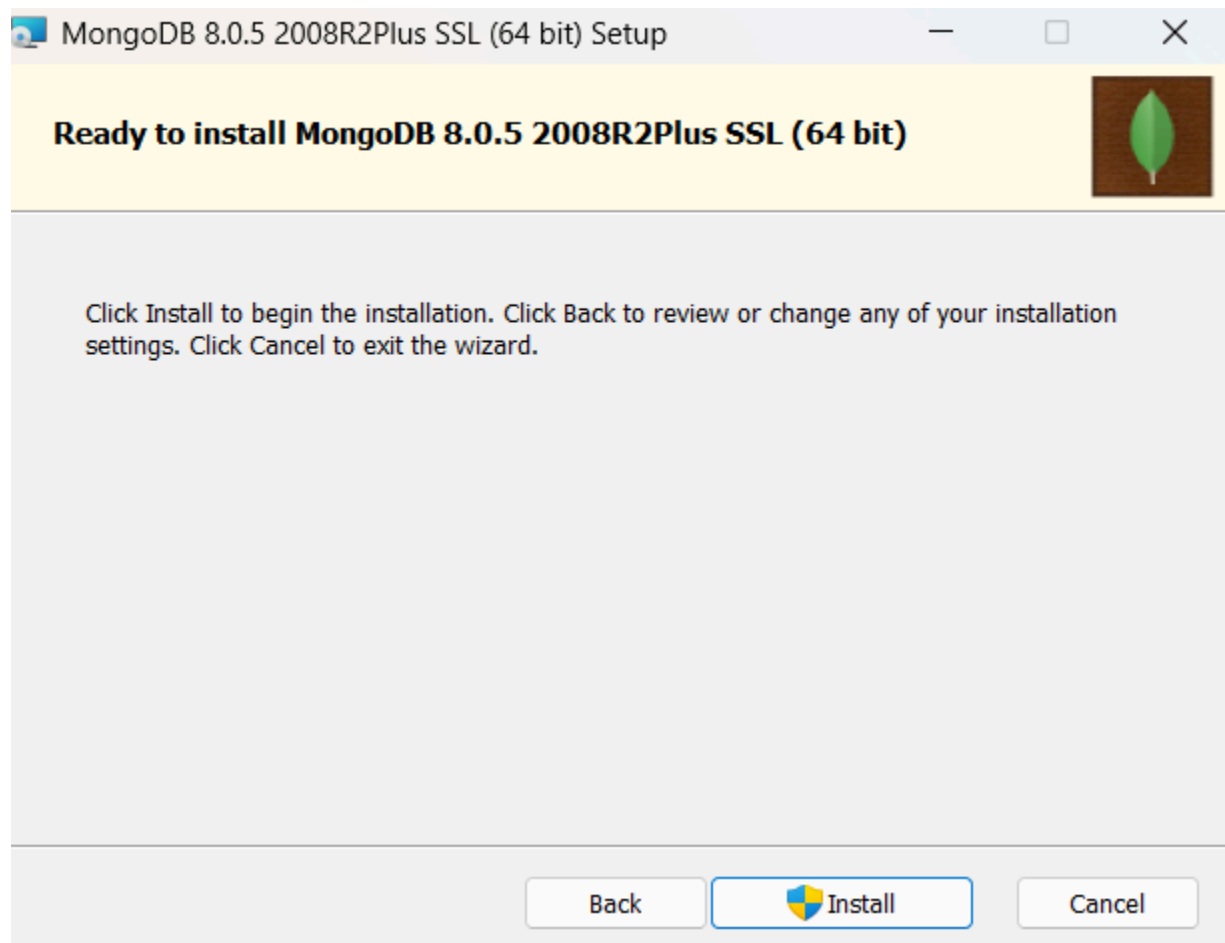

Log Directory:

< Back Next > Cancel

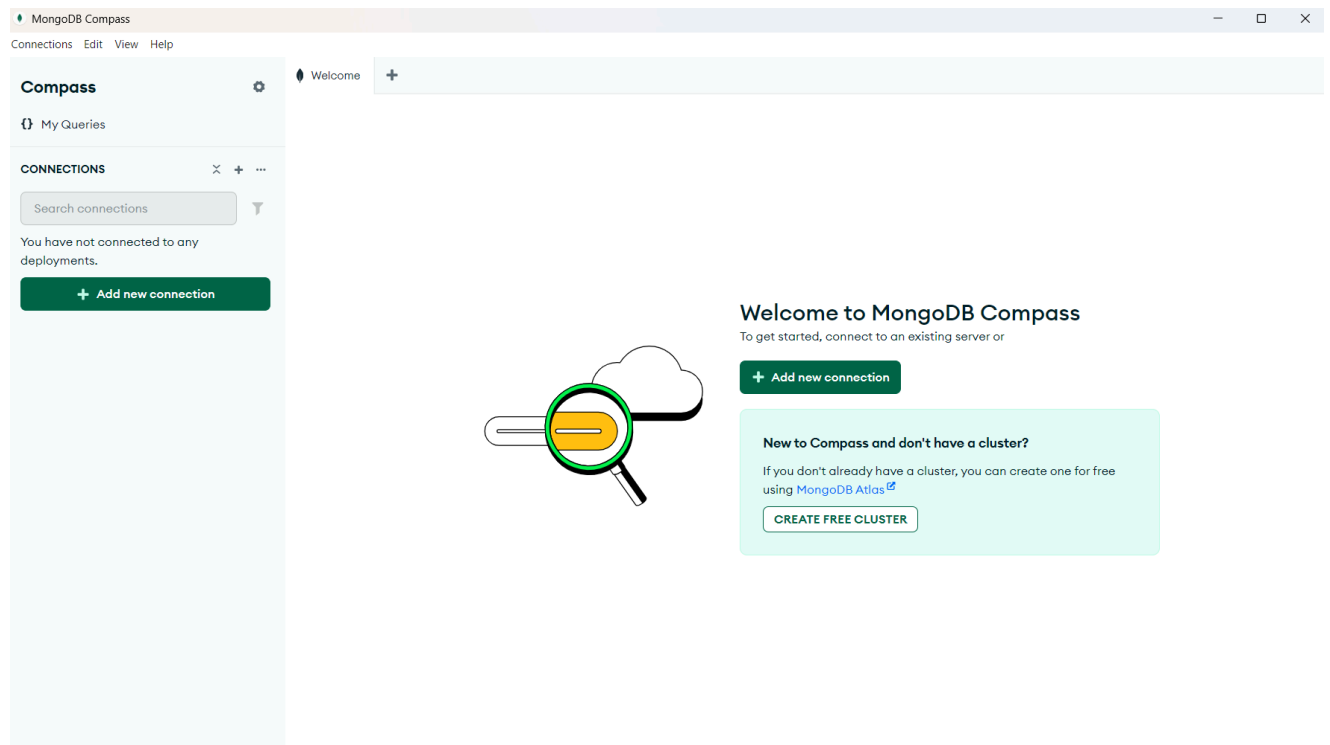

7. Proceed MongoDB compass installation by clicking 'Next'

8. Hit 'Install' to proceed MongoDB installation

9. After installation you will see the 'MongoDB Compass' page opens. MongoDB Compass is a GUI interface to work with the database. Click 'Add New Connection'

10. Leave the default values for URI and click 'Save & Connect'

New Connection

Manage your connection settings

URI ⓘ

Edit Connection String 

mongodb://localhost:27017/

Name

Color

No Color ▼

☐ Favorite this connection

Favoriting a connection will pin it to the top of your list of connections

➤ Advanced Connection Options

How do I find my connection string in Atlas?

If you have an Atlas cluster, go to the Cluster view. Click the 'Connect' button for the cluster to which you wish to connect.
[See example](#) 

How do I format my connection string?

[See example](#) 

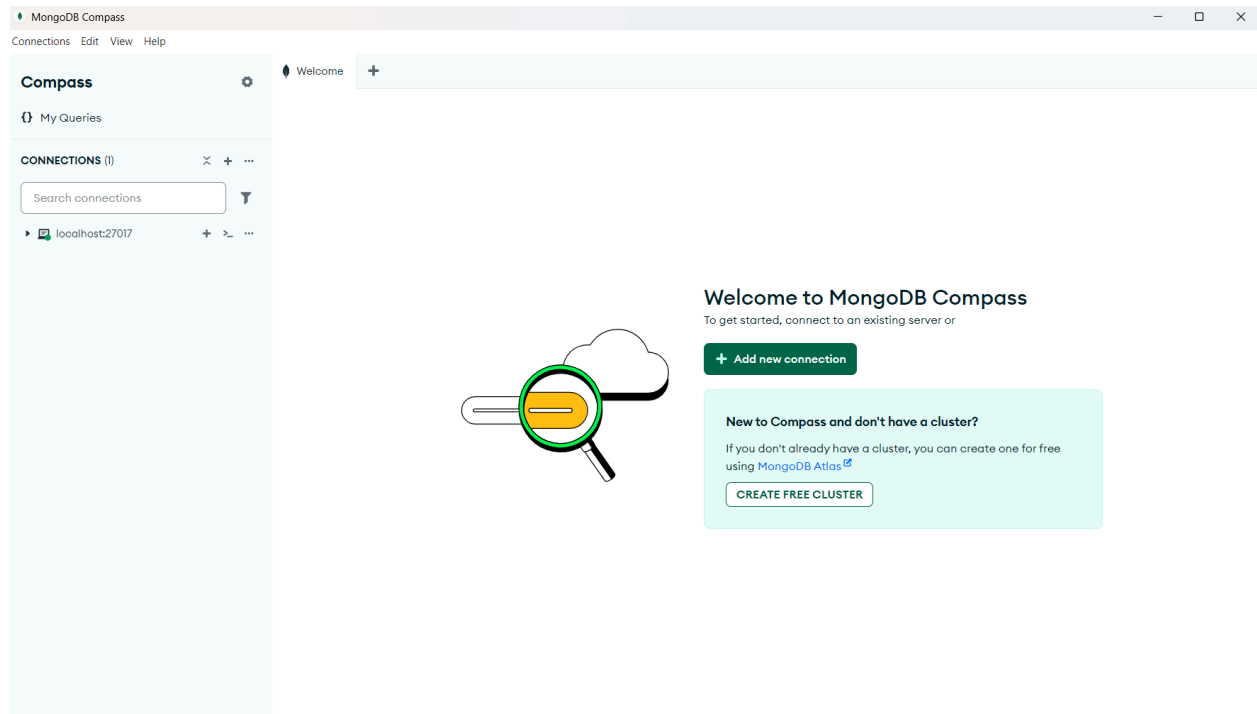

Cancel

Save

Connect

Save & Connect

11. You can see one connection is successfully created

2. MongoDB Shell Installations ([zip file download](#))

1. Go to <https://www.mongodb.com/try/download/shell>
2. Download the zip file

Learn more

Version	2.4.2	▼
Platform	Windows x64 (10+)	▼
Package	zip	▼

Download 

 Copy link

More Options 

You will see file 'mongosh-2.4.2-win32-x64' is downloaded

3. Extract the zip folder. Under 'bin' folder you will see a file named 'mongosh'. Double-click the file. It will open mongosh shell

name	Date modified	type	Size
Last week			
 mongosh	11-03-2025 07:30	Application	1,11,538 KB
 mongosh_crypt_v1.dll	11-03-2025 07:30	Application extens...	26,522 KB

4. 'Hit' enter

5. Connection to the database has been successfully established via mongosh shell.
You can start executing mongodb commands on the shell

```
mongosh mongodb://127.0.0.1:27017/ × +
Please enter a MongoDB connection string (Default: mongodb://localhost/):
Current Mongosh Log ID: 67de195fbc398d919b71235
Connecting to:  mongodb://127.0.0.1:27017/?directConnection=true&serverSelectionTimeoutMS=2000&appName=mongosh+2.4.2
Using MongoDB:      8.0.5
Using Mongosh:      2.4.2
For mongosh info see: https://www.mongodb.com/docs/mongosh-shell/

-----
The server generated these startup warnings when booting
2025-03-22T07:05:58.651+05:30: Access control is not enabled for the database. Read and write access to data and configuration is unrestricted
